BIOGRAPHY

I am a final-year Ph.D. student at the University of Illinois, Chicago. I've published over 20 papers at prestigious conferences like ICLR, NeurIPS, ICML, ACL, NAACL, EMNLP, etc., earning about 700 citations. My research studies how to adapt the **foundation models**, particularly **large language models (LLMs)**, for an **ever-changing world** characterized by **emerging** domains, events, topics or information. This includes (but not limited to) (1) **Large Language Model (pre-training, post-training and frontiers, e.g., retrieval-augmented generation, ranging from 1B to 30B)** - presented at ICLR23, EMNLP22a, EMNLP22b; (2) **Continual and Lifelong Learning (task, class, and domain-incremental)** - presented at ICML23, NeurIPS20,21,22; (3) **Natural Language Processing (classification, generation and extraction)** - presented at EMNLP23, NAACL21, EMNLP21; (4) **Argument Mining** - presented at ACL18,19; IJCAI18,19.
