BIOGRAPHY

I am a final-year Ph.D. student at the University of Illinois, Chicago. My research studies how to make the knowledge in **foundation models**, particularly **large language models** (LLMs), more **reusable** and **updatable**. This includes (but not limited to) (1) **Large Language Model (pre-training, post-training and frontiers, e.g., retrieval-augmented LLM)** - presented at ICLR23, EMNLP22a, EMNLP22b; (2) **Continual and Lifelong Learning (task, class, and domain-incremental)** - presented at ICML23, NeurIPS20,21,22; (3) **Natural Language Processing (classification, generation and extraction)** - presented at EMNLP23, NAACL21, EMNLP21; (4) **Argument Mining** - presented at ACL18,19; IJCAI18,19.
